Heart and Vascular Medicine Comes to CCMH

When a helicopter leaves the helipad at Coshocton Hospital, it’s most often carrying a patient with chest pains. Without a heart center and fulltime cardiologist, our local option has been emergency transport for the safety of our patients. Coshocton County hearts now have fulltime heart care as we welcome invasive cardiologist and vascular medicine specialist Ahmed A. Habib, MD, FACC, FAVM, to Coshocton Hospital.

Dr. Habib’s expertise will enable Coshocton Hospital to diagnose and treat patients with coronary, peripheral vascular and acute/chronic venous disease. In addition, his team will treat patients with heart failure and cardiac rhythm disorders.

Dr. Habib joins CCMH from Moberly Regional Medical Center in Moberly, Missouri, where he has served as the director of the heart and vascular center since 1997. He started the hospital’s heart program which grew to include three additional cardiologists. He has also served as assistant professor at the University of Missouri – Columbia Department of Medicine’s Division of Cardiology.

Coshocton County hearts now have fulltime heart care as we welcome invasive cardiologist and vascular medicine specialist Ahmed A. Habib, MD, FACC, FAVM

Dr. Habib is board-certified in Cardiology, General Vascular and Endovascular Medicine. He earned his Doctor of Medicine from Osmania University in Hyderabad, India. Dr. Habib completed his residency in internal medicine at St. Joseph’s Hospital, an affiliate of Northwestern University in Chicago, and went on to complete a 3-year fellowship in cardiovascular diseases at the University of Missouri in Columbia.

To schedule an appointment for heart or vascular services, call (740) 623-4481.
Highly-skilled general surgeons Hoang Lim, DO, and Keith Harmon, MD, and gynecologic surgeon Dana N. Owens, MD, and the addition of $1.2 million in state-of-the-art surgical equipment have revolutionized the landscape of surgical care at Coshocton Hospital.

Newly installed endoscopic/laparoscopic equipment – combined with the skill of new surgical specialists – makes minimally invasive surgery possible for a variety of surgical procedures including general surgery, orthopedics, urology and gynecology. Minimally-invasive surgery means only small incisions, less pain, quicker recovery and a faster return to your normal lifestyle. All this means lower cost since many procedures are done as an outpatient with return to work in days instead of weeks.

Dr. Keith Harmon earned his Doctor of Medicine from the University of Kentucky in Lexington, he served his internship and residency in general surgery at Grand Rapids Medical Education Research Center (GRMERC), Michigan State University. He joined CCMH in July, coming to Ohio from Intermountain Health Care in Burley, Idaho, where he was chief of surgery. He specializes in minimally invasive (laparoscopic) gallbladder, appendectomy and hernia surgeries, colorectal surgery, thyroid surgery and hernia repair.

Dr. Hoang Lim earned her Doctor of Osteopathic Medicine from Midwestern University Arizona College of Osteopathic Medicine. She completed her residency in general surgery at St. Vincent Mercy Medical Center, where she served as chief surgical resident. Dr. Lim moved to Coshocton in August and holds special interest in minimally invasive surgery as well as breast, colorectal and thyroid surgery.

Dr. Owens earned her Doctor of Medicine from the University of South Florida College of Medicine in Tampa. She served her residency in obstetrics and gynecology at the University of Cincinnati Medical Center in Cincinnati, and completed a Fellowship in Gynecologic Endoscopy and Pelvic Reconstructive Surgery at the Florida Hospital Celebration Health in Celebration, Fla. Her areas of special interest include minimally invasive gynecologic surgery; pelvic reconstructive surgery; adult, adolescent and pediatric gynecology; and the management of gynecologic conditions such as abnormal uterine condition, cervical disease, pelvic pain and menopausal health.

A colonoscopy is performed under anesthesia and allows a surgeon to view the inside of the colon, the lower end of the digestive system. A colonoscopy identifies polyps that grow inside the colon and need to be removed before they become cancerous. In most cases, the polyps can be removed during the procedure and often a follow-up screening is not required for five to 10 years, depending on family history and other risk factors.

Coshocton Hospital’s new Endoscopy Unit, located on the third floor of the hospital, provides a comfortable, relaxing experience for endoscopy procedures including colonoscopy and EGD. With Propofol sedation, you’ll sleep deeply and wake less groggy than with other anesthetics.

Don’t take a chance on your good health.

Call the Coshocton Surgery Center today to schedule your appointment for a screening colonoscopy with Dr. Hoang Lim or Dr. Keith Harmon at (740) 295-3360.
Did You Know…

Coshocton Hospital Outpatient Rehab offers a caring staff of seven physical therapists, two occupational therapists, 8 PTAs and 2 OTAs to help you get back to work and life following an injury, surgery or severe illness.

Our 10,000 square foot therapy facility is fully equipped to help you regain strength and mobility to return to the activities you enjoy.

Speech Therapists Kenzie Manns, MA, CCC-SLP, and Kristin K. Russell, MS, CCC-SLP, provide therapy services for children and adults with speech, language or swallowing difficulties. Their skill with speech and language issues resulting from autism, hearing, articulation, stroke or other disorders can dramatically impact the future development of a child, or correct a life-altering problem for an adult.

Outpatient therapy also includes the services of Doctor of Audiology Cheryl Barker, Au.D. Dr. Barker can help with diagnosing hearing problems, prescribing and dispensing hearing aids and providing hearing aid repairs.

Did you know you can find all these services in the Outpatient Rehab in the lower level of the 311 Building, located at the corner of Walnut and 15th Streets in Coshocton?

See how we can help today by calling (740) 623-4069.

THESE PROVIDERS ARE WELCOMING NEW PATIENTS.

Need a Doctor?

Enjoy the convenience of quality care from your local providers.

Patients of our family practice providers enjoy the benefits of same-day appointments. Just call by 11 a.m., Monday through Friday, and we will get you scheduled with a provider on the same day.
